

SEPT 2024

Late Summer Treatment On Your Lawn

Bermuda and Zoysia: These lawns are getting the last application of nitrogen for the season as well as their first application of weed preventer this fall. A couple of goodies we have in the mix are iron and bio stimulants to give the lawns an extra boost in color.

Fescue: It is time for fescue to be relieved from the stress of the summer heat. These lawns are receiving a blanket broadleaf weed control, spot spray of nutsedge, and our favorite granule fertilizer. The fertilizer is a blend of organic and synthetic nutrients.

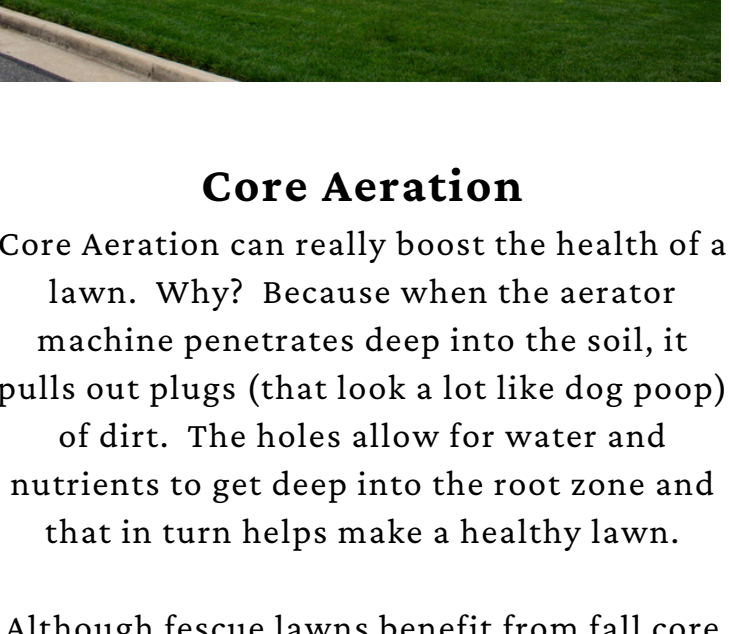

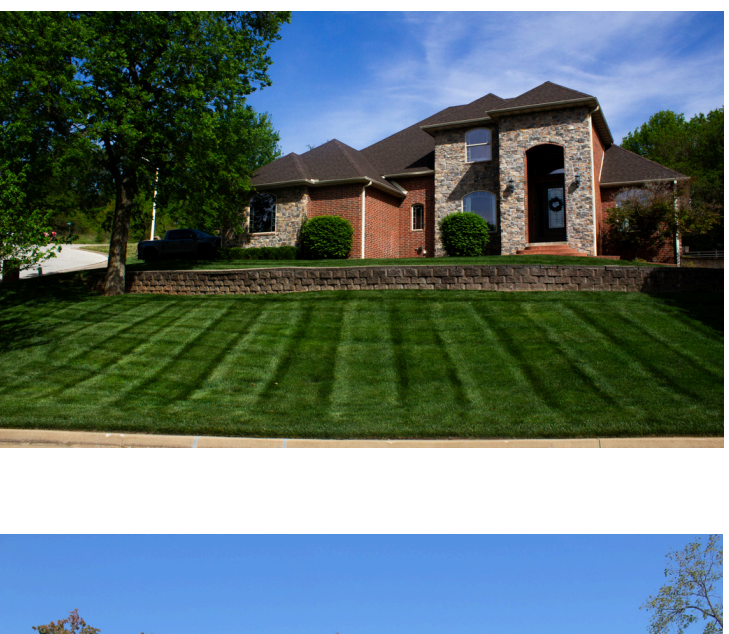

Education: Seeding

Seeding season is HERE! Don't miss this prime window. Spring is NOT the ideal seeding time on fescue lawns because the seedlings won't mature before the summer heat; it will burn up the seedlings. The weather is soon to cool off.

Fescue loves the cool weather and is getting ready to shine in all of it's glory. Having more predictable rains and cooler weather sets a seedling up for better chances of survival.

Having the proper equipment and selecting the right seed is crucial in long term success and beauty of the lawn. Not all varieties are made equal. We have put years into trialing various blends to select what works best in our area. DO NOT skimp on seed quality to save money. It will cost you much more in the long run.

See photos below of our transformed lawns.

Core Aeration

Core Aeration can really boost the health of a lawn. Why? Because when the aerator machine penetrates deep into the soil, it pulls out plugs (that look a lot like dog poop) of dirt. The holes allow for water and nutrients to get deep into the root zone and that in turn helps make a healthy lawn.

Although fescue lawns benefit from fall core aeration alone, it is the perfect time to overseed. Overseeding is needed to thicken a lawn and repair areas damaged and stressed from the summer.

Pro Tip: Add Dirt to Level Your Lawn

Do you have pot holes that swallow your foot or mower tires? Now would be the time to think about getting those spots levels with dirt and then preparing for any seed needs you may have.

We do not provide dirt work but can happily recommend a professional company to help you out!

Landscape Bed Weed Preventer

ADD-ON SERVICE

This is the 3rd and last of the Landscape Bed Weed Preventer applications for the year. This preventer will help to prevent the weeds that you see germinating in the early spring such as henbit, chickweed, hairy bittercress, purple dead nettle, and others.

A MESSAGE FROM SOME HAPPY CUSTOMERS ABOUT THEIR LANDSCAPE BEDS!

PURE Lawn helped us tremendously in the yard. We had massive bare spots, and with our steep runoff, it was hard to grow any grass. PURE was able to get our yard back to looking green and full. They even kept all of our landscape beds weed-free. I highly recommend them for all your outdoor needs.

PURE Lawn is amazing. They have done miracles with our lawn and flower beds

Bare Ground Applications Available to Clean Pesky Driveway Weeds Up

Contractor Recommendations

We always get questions about who we recommend for services we don't offer. So we keep this ongoing list just for you!
