

OCT/NOV 2024

## Fall Treatment On Your Lawn

**Bermuda and Zoysia:** As temperatures drop, new weeds (winter annuals), begin to germinate and grow. bermuda and zoysia are receiving the second of the two fall weed preventers. The first hard frost sends these grasses into dormancy.

**Fescue:** Coming up this month we are beginning our heavy nitrogen fertility apps. This is the most beneficial time to fertilize tall fescue. The high nitrogen application will give the lawn an extended green color into winter as well as provide a nice spring green-up.

## 2025 Service Proposal

We plan to send out your 2025 Proposal in Late November or December. You can think of our services like a subscription that auto-renews yearly. All proposals will automatically be put into Work Order status on Feb 1st, 2025 for the 2025 season UNLESS you tell us to cancel service. Our first visit typically begins in late February/early March. We will offer our 5% prepay discount again until Feb. 1st when prepaying for 2025 services BY CHECK ONLY. Any service added after Feb. 1st will not qualify for this discount.

## Service Catalog

Below we'd like to provide an overview of services we offer in case you are interested in any of these services being quoted. **Send us a message of what you are interested in!** You can save BIG by adding on any services you know you want and then prepaying!

## People/Pets

### Mosquito/Flea/Tick Program

These applications target pests that affect people & pets. There are 3 program options for customers to choose from: *Mosquito Only*, *Flea and Tick Only*, or bundling *Mosquito, Flea and Tick* together to save on each application cost.

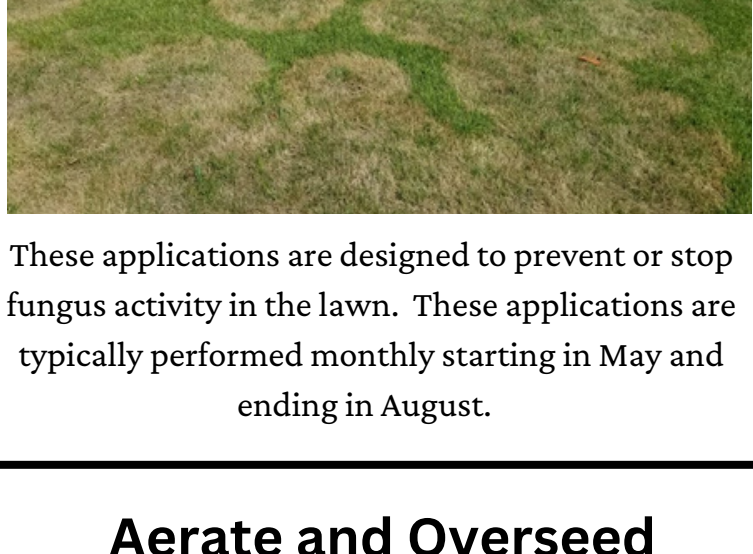

## Landscape

### Tree and Shrub Insect and Disease Control

We perform these applications to prevent pests from wreaking havoc on your *landscape*. Our applications protect against common pests such as Japanese Beetles, bagworms, army worms, aphids, mites, blister beetles and more.

### Tree/Shrub Fertilization

An application of macro and micro nutrient fertilizer to promote growth, health and vigor of trees and shrubs.

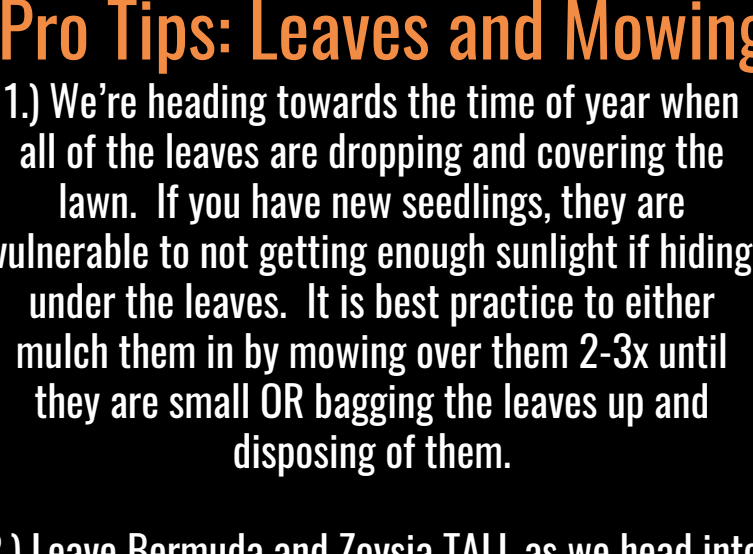

### Landscape Bed Weed Preventer

Intended for those that don't like to hand pull every weed. This service is performed 3x's a year. This service CANNOT be performed in beds with annual flowers and DOES NOT prevent Bermuda and Nutsedge.

## Lawn

### Fungicide Applications

These applications are designed to prevent or stop fungus activity in the lawn. These applications are typically performed monthly starting in May and ending in August.

### Aerate and Overseed

A necessary service for those who want to maintain and have a healthy, thick, and beautiful lawn. Aeration pulls plugs out of the soil that then allows for water and nutrients to get to the root zone.

## Other

### Bare Ground Applications

This application is performed 2x/year, Spring and Fall and is meant to take care of pesky weeds in non-grassy areas, such as:

- Gravel Driveways/Parking Areas
- Fence Rows
- Rock-Only Landscape Areas
- Concrete and Asphalt Cracks

## Pro Tips: Leaves and Mowing

1.) We're heading towards the time of year when all of the leaves are dropping and covering the lawn. If you have new seedlings, they are vulnerable to not getting enough sunlight if hiding under the leaves. It is best practice to either mulch them in by mowing over them 2-3x until they are small OR bagging the leaves up and disposing of them.

2.) Leave Bermuda and Zoysia TALL as we head into winter. Leaving the bermuda tall will help prevent weeds throughout the winter when these grasses are not growing.

## Contractor Recommendations

We always get questions about who we recommend for services we don't offer. So we keep this ongoing list just for you!

**JASPER RIDGE LLC - CARSON JENSEN - 417-396-4044**  
Landscaping (Large Projects) · Irrigation · Drainage · Commercial Snow Removal
