After

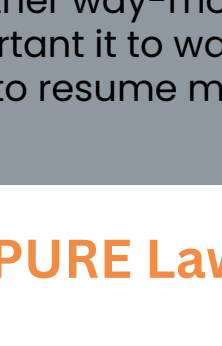

Late Spring Treatment On Your Lawn

Fertilizer Application- organic based fertilizer designed to provide a deeper green color and thickening of the lawn.

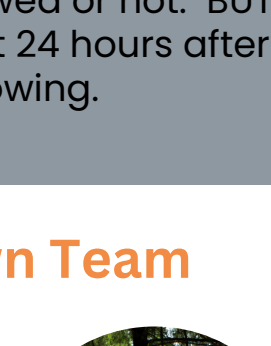

Weed Control Application- designed to kill broadleaf weeds currently in the lawn.

Prickly Lettuce

Dandelion

Clover

Commonly Asked Questions/Answers

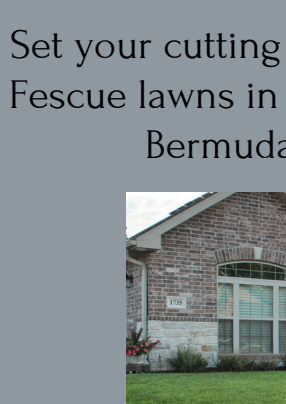

Q: When can I let my pets/kids back out on the lawn after you've treated?

A: When the lawn is dry. There is not a set amount of time because the weather is different every day. You can feel the grass to see if it is dry. If it is, it is safe to reenter the lawn.

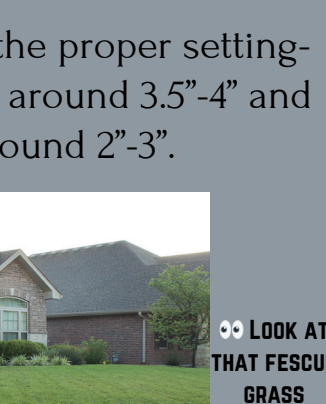

Q: Should I mow before you come?

A: Mowing the lawn before we come is not necessary. It won't make much of a difference either way-mowed or not. BUT what is important it to wait 24 hours after a treatment to resume mowing.

Pro Tip: Get Those Blades SHARP!

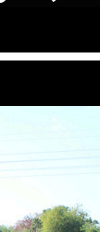

Sharp blades make a prettier cut and are less stressful on the lawn than dull blades.

Set your cutting height to the proper setting- Fescue lawns in the spring around 3.5"-4" and Bermuda/Zoysia around 2"-3".

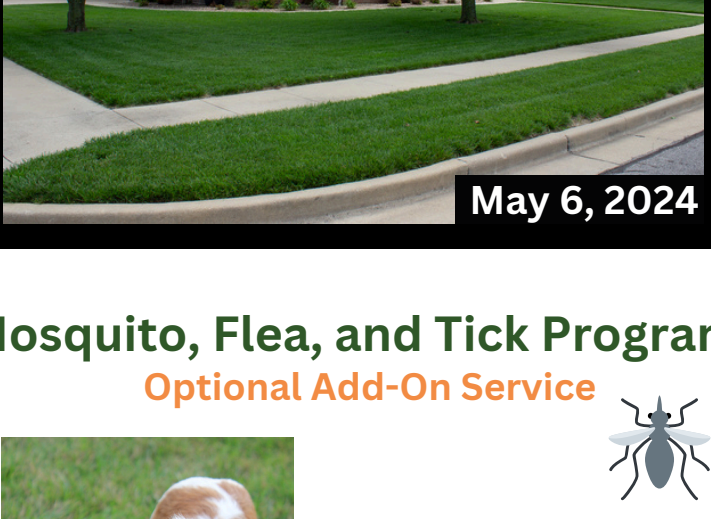

LOOK AT THAT FESCUE GRASS HEIGHT AND EDGE!

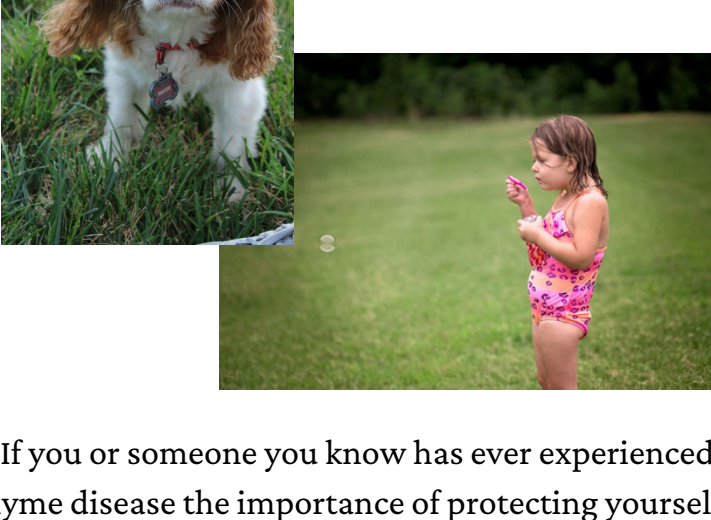

PATIENCE IS KEY

You really can't have a healthy, beautiful lawn without a little patience. Grasses have to receive the proper nutrients, water, sunlight, and mowing in order to take off and thrive. For those who have had patience, the results should speak for themselves!
